

MAT 511
Advanced Calculus
MW 12:45-2:05 Carn 219

Professor: Andrew Vogel

Office: 229F Physics Building Phone: 443-1584

Office hours: TuTh, 10:00-11:00pm, MW, 9:00-10:00pm,, and by appointment.

email: alvogel@syr.edu

Prerequisites: MAT 331 and MAT 397.

Textbook: *Advanced Calculus*, fifth edition, Wilfred Kaplan, . We will cover parts of chapters 1-5. Differential Calculus of functions of several variables, implicit and inverse functions, maxima and minima, gradient, divergence, curl. Integral Calculus of functions of several variables, double and triple integrals, change of variable, arc length, surface area, Leibnitz's rule. Vector Integral calculus, line integrals, Green's theorem, independance of path, surface integrals, divergence theorem, Stokes's theorem.

Calculators: You are allowed to use a graphics calculator (such as the TI-83+) on all assignments, quizzes and exams (including the final). Symbolic calculators (such as the TI-89 or the TI-92) may not be used on quizzes or exams (including the final).

Grading: There will be two semester exams (25%) on October 3 and November 7, the final exam (30%) and weekly homework (20%)

Tests will be given in lecture. The final exam will be cumulative. There will be **no make-ups** for the tests or final exam. If you have an excused absence for one of the tests, your grade on the relevant portion of the final will be used.

Academic Integrity: The Syracuse University Academic Integrity Policy holds students accountable for the integrity of the work they submit. Students should be familiar with the Policy and know that it is their responsibility to learn about instructor and general academic expectations with regard to proper citation of sources in written work. The policy also governs the integrity of work submitted in exams and assignments as well as the veracity of signatures on attendance sheets and other verifications of participation in class activities. Serious sanctions can result from academic dishonesty of any sort. For more information and the complete policy, see <http://academicintegrity.syr.edu>

Disability: Students who may need academic accommodations due to a disability are encouraged to discuss their needs with the instructor at the beginning of the semester. In order to obtain authorized accommodations, students should be registered with the Office of Disability Services (ODS), 804 University Avenue, Room 309, 315-443-4498 and have an updated accommodation letter for the instructor. Accommodations and related support services such as exam ad-

ministration are not provided retroactively and must be requested in advance.”
For more information about services and policy, see Office of Disability Services

Office of Disability Services

Program Learning Outcomes (Mathematics Majors)

In all outcomes that call for mastery of some skill, such mastery is called for at the appropriate undergraduate level. Moreover, levels of mastery may well vary from student to student.

- Understanding the nature and role of deductive reasoning in mathematics
- Ability to use and understand the usage of mathematical notation
- Ability to follow proofs and other mathematical discourse
- Ability to write simple proofs in the major proof formats (direct, indirect, inductive), and, more generally, to engage in mathematical discourse
- Ability to select an appropriate mathematical model for a given real world problem
- Ability to apprehend and enunciate the limitations of conclusions drawn from mathematical models
- Ability to do hand calculations accurately and appropriately
- Ability to do calculations with the aid of appropriate hardware and/or software
- Having a basic knowledge of the contributions and significance of important historical figures in mathematics
- Having a basic knowledge of the major modern theories of analysis, abstract algebra, geometry, and applied mathematics
- Ability to effectively use mathematical word processing software
- Having a basic understanding of career options available to mathematics majors
- Ability to locate and use sources and tools that aid mathematical scholarship
