Syllabus for Prob. & Stats for Lib. Arts II
MAT122 - Section M100
(Fall-2012)

Lecture: Tuesday and Thursday, 03:30PM-4:50 PM at Physics building Stolk.
Instructor/Supervisor: Dr. Abdellatif Bourhim
Office: Carnegie 219-B
Phone: (315) 443-1587
E-mail: abourhim@syr.edu
Office Hours: Tuesday and Thursday: 2:00 PM-3:20 PM.

Mathematical Prerequisites and Restrictions: MAT 121 is a prerequisite for MAT 122. A student cannot receive credit for MAT 122 after completing any MAT course numbered above 180 with a grade of C or better.

MAT 122 and the Liberal Arts Core: The sequence MAT 121– MAT 122 can be used to satisfy the quantitative skills requirement of the liberal arts core in the College of Arts and Sciences.

Labs/Recitations: When you registered for this course you should have also registered for a recitation section that goes with it. There will be computer lab assignments to be done during these recitation times, which you must hand in to be graded. Please bring your textbook, laboratory manual, and calculator to these recitations.

Homework: Homework is for your practice and should not be handed in; it will not be graded. In this syllabus is a long list of recommended problems for each section. A good strategy is to do enough of them so that you feel confident with the material.

Exams: You should bring your textbook (not the lab manual) and calculator to each exam (including the final). You will be allowed to use your textbook (not the lab manual) and calculator during the exam, but will not be allowed to use any notes other than what you write in your textbook or attach (modestly) to it.
There will be four in-class midterm exams and a final exam.

<table>
<thead>
<tr>
<th>Test</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test 1</td>
<td>September 20, 2012</td>
</tr>
<tr>
<td>Test 2</td>
<td>October 11, 2012</td>
</tr>
<tr>
<td>Test 3</td>
<td>November 06, 2012</td>
</tr>
<tr>
<td>Test 4</td>
<td>November 29, 2012</td>
</tr>
<tr>
<td>Final</td>
<td>December 12, 2012</td>
</tr>
</tbody>
</table>

There will be no make-up exams for the midterm exams and the final. In the case of excused absences or otherwise at the discretion of the instructor, the final exam will be counted extra to make up for missed exams.

The final grades will be computed as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Each of the four midterm exams</td>
<td>15%</td>
</tr>
<tr>
<td>Labs/recitations</td>
<td>20%</td>
</tr>
<tr>
<td>Final exam</td>
<td>20%</td>
</tr>
</tbody>
</table>

Your letter grade for the term then comes from the following table.

<table>
<thead>
<tr>
<th>Percentage Range</th>
<th>Letter Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>0–59%</td>
<td>F</td>
</tr>
<tr>
<td>60–69%</td>
<td>D</td>
</tr>
<tr>
<td>70–72%</td>
<td>C-</td>
</tr>
<tr>
<td>73–76%</td>
<td>C</td>
</tr>
<tr>
<td>77–79%</td>
<td>C+</td>
</tr>
<tr>
<td>80–82%</td>
<td>B-</td>
</tr>
<tr>
<td>83–86%</td>
<td>B</td>
</tr>
<tr>
<td>87–89%</td>
<td>B+</td>
</tr>
<tr>
<td>90–92%</td>
<td>A-</td>
</tr>
<tr>
<td>93–100%</td>
<td>A</td>
</tr>
</tbody>
</table>

**Final Exam:** MAT 122 will be assigned a two-hour time slot from 8:00am to 2:30pm on Wednesday, December 12, 2012. The exact time and location for the 2-hour time slot for the final exam will be announced in lecture near the end of the term. The final exam will not be given at any other time. **Do not make plans to leave campus on Wednesday, December 12, 2012 before 2:30PM.**

**Calculator:** Your calculator should be able to take square roots. A fairly sophisticated calculator is recommended. The TI-83 is particularly recommended and will be used by the instructor in class. Many of the formulas in MAT 122 are complicated; you should attempt to become proficient at using the calculator. The best way to do that is to bring your calculator to class and get into the habit of doing computations along with the instructor.

**Students with Disabilities:** If you believe that you need accommodations for a disability, please contact the Office of Disability Services (ODS), http://disabilityservices.syr.edu, located in Room 309 of 804 University Avenue, or call (315) 443-4498 for an appointment to discuss your needs and the process for requesting accommodations. ODS is responsible for coordinating disability-related accommodations and will issue students with documented disabilities Accommodation Authorization Letters, as appropriate. Since accommodations may require early planning and generally are not provided retroactively, please contact ODS as soon as possible. You are also welcome to contact me privately to discuss your academic needs although I cannot arrange for disability-related accommodations. Making arrangements with ODS takes time. Do not wait until just before the first test.

**Available student assistance:** Instructor office hours, TA office hours, Math Clinic,
Review sessions.

**Academic Integrity:** The Syracuse University Academic Integrity Policy holds students accountable for the integrity of the work they submit. Students should be familiar with the Policy and know that it is their responsibility to learn about instructor and general academic expectations with regard to proper citation of sources in written work. The policy also governs the integrity of work submitted in exams and assignments as well as the veracity of signatures on attendance sheets and other verifications of participation in class activities. Serious sanctions can result from academic dishonesty of any sort. For more information and the complete policy, see http://academic.integrity.syr.edu. For this course in particular, failure to obey the rules about what sorts of notes you are allowed to use during exams is considered to be a violation of the academic integrity policy. These rules are found on pages 1 and 6 of the syllabus.

**Goals:** The goal of MAT 122 is to provide the student the following.

- A basic understanding of several types of the statistical process hypothesis testing.
- Some knowledge about how to find the line “best fitting” a set of points and how that line can be used.
- Familiarity with matrices and solving systems of linear equations.
- Exposure to applications of matrix arithmetic
- Practical experience with statistical computer software (Minitab).
Suggested Homework Problems (During lecture the instructor might suggest more).

8-2: 1-44 odd.
8-3: 1-32 odd.
8-4: 1-18 odd.
8-5: 1-28 odd.
8-6: 1-16 odd.
10-3: 1-28 odd.
11-3: 1-22 odd.
13-2: 1-20 odd.
13-7: 1-14 odd.
14-2: 1-20 odd.
14-3: 1-14 odd.
7.6: 1, 3, 5, 7, 9, 11, 23, 25, 31, 39.
2.1: 1, 3, 5, 17, 19, 23, 25, 27, 31, 37, 39, 47, 49.
2.2: 1, 3, 5, 7, 11, 13, 15, 17, 19, 27, 29, 39, 41, 45, 55, 63, 65
2.3: 1-44 odd.
2.4: 1-20 odd, 31, 37, 43, 49.
2.5: 1-18 odd, 27, 29, 35, 37, 49, 59, 65
2.6: 1-20 odd, 27, 29.
10.2: 1-24 odd, 25, 27a, 31, 41
Labs/Recitations:

1. Instructor cover: 8-3, Testing Hypotheses About \( p \).

2. Students do 8-1, 8-2, 8-3 (as time allows)

3. Instructor cover: 8-5, Testing Hypotheses About \( \mu \) (using \( t \)) and 8-6 Testing Hypotheses About \( \sigma \) or \( \sigma^2 \).

4. Students do: Experiments 8-6, 8-10, 8-14.

5. Instructor cover: 10-1 Scatter Plot, 10-2 Correlation, 10-3 Regression.

9. 14-4, cover \( p \)-chart, students do 14-9, 14-12.

10. Start with Bayes’ Theorem (from supplemental part of the text).

11-13. Instructor will cover material from Finite Mathematics appropriate to what has been covered in the main lecture.
