

MAT 412 M003 : Introduction to Real Analysis I, Fall 2017

Instructor: Will Wylie

email: wwylie@syr.edu

Office: 206C Carnegie

Phone: (315) 443-1556

Office hours: Tu 11-12, We 10-11, Th 10-11 and by appointment.

Lecture: MoWe 12:45-2:05, 120 Carnegie

Course description: Introduction to the foundations of calculus covering topics from the following: the real number system, functions, limits, sequences, infinite series, continuity, and uniform continuity.

Prerequisites: (MAT 375 OR CIS 375) AND MAT 397.

Textbook: *Introduction to Real Analysis* (4th ed.) by W. Wade, ISBN 9780132296380. The course material is based on Chapters 1-5.

Attendance: I will not take roll to check attendance. *However, it will be very hard to catch up if you miss class.* I will not always follow the book or cover all of the material in the book. *If you miss class, you must get the notes from another student - I will not provide notes for missed lectures.*

Homework & Quizzes: There will be homework sets collected weekly and quizzes given almost every day at the beginning of class. Homework Quizzes will be given on most days when a homework assignment is due and will consist of one or two questions similar to the homework. The lowest HW quiz score will be dropped. True/False Quizzes will be given at the beginning of class on most days, and will be based on the material of previous class. Two lowest T/F quiz scores will be dropped.

You may collaborate on homework but you must write up and hand in your own solutions. Good mathematical exposition is expected on all written assignments. *Copying homework or exam solutions from any source, including the Internet, is considered cheating.* If you get stuck on a problem, you should seek out help from me or from other students in the class.

Exams: There will be two midterm exams and a comprehensive final exam. The midterm exams are tentatively scheduled for

Exam 1 Wed, October 4

Exam 2 Wed, November 15

There are no calculators or electronic devices of any kind allowed during the exam. There will be no makeup exams. Any exam missed with a legitimate written excuse will be made up by giving extra weight to the final exam.

Final Exam: Monday, December 11, 12:45-2:45.

All students must take the final exam at this time to pass the course.

Grading policy: Your grade will be calculated as follows:

T/F Quizzes	5%
Homework	10%
HW Quizzes	15%
2 Exams (20% each)	40%
Final Exam	30%

The final exam may be given more weight if it demonstrates improved understanding.

The grading scheme will be no stricter than: 93 for A, 90 for A-, 87 for B+, 83 for B, 80 for B-, 77 for C+, 73 for C, 70 for C-, 60 for D

Blackboard: All assignment, handouts, or other information will be posted on blackboard. Grades will also be recorded in blackboard, please check that they are recorded correctly regularly.

How to succeed: Here are a few basic suggestions for how to succeed in this course.

1. It is absolutely essential that you understand how to solve the assigned homework problems and, more importantly, how and why the skills and techniques presented in the course are used in solving the assigned problems.
2. Ask questions.
3. Stay caught up. Mathematical concepts build on each other and you need to stay on top of the material at every stage. If you are having difficulty, don't expect that the problem will disappear. Contact me immediately and discuss the problem.
4. Form a study group. Many students benefit from a study group to work through challenging problems and to review for exams. You should attempt the problems ahead of time by yourself and then work through any difficulties with your study partners. Explaining your reasoning to another student can help to clarify your own understanding.
5. You should expect to work hard. Don't get discouraged if you find some of the material very difficult. Be persistent and patient!

Students with disabilities: If you believe that you need academic adjustments (accommodations) for a disability, please contact the Office of Disability Services (ODS), located in Room 309 of 804 University Avenue, visit the ODS website- <http://disabilityservices.syr.edu>, or call (315) 443-4498 or TDD: (315) 443-1371 for an appointment to discuss your needs and the process for requesting academic adjustments. ODS is responsible for coordinating disability-related academic adjustments and will issue students with documented Disabilities Accommodation Authorization Letters, as appropriate. Since academic adjustments may require early planning and generally are not provided retroactively, please contact ODS as soon as possible.

Syracuse University values diversity and inclusion; we are committed to a climate of mutual respect and full participation. My goal is to create learning environments that are useable, equitable, inclusive and welcoming. If there are aspects of the instruction or design of this course that result in barriers to your inclusion or accurate assessment or achievement, I invite any student to meet with me to discuss additional strategies beyond academic adjustments that may be helpful to your success.

Religious observances policy: Syracuse University's Religious Observances Policy recognizes the diversity of faiths represented among the campus community and protects the rights of students, faculty, and staff to observe religious holy days according to their tradition. Under the policy, students are provided an opportunity to make up any examination, study, or work requirements that may be missed due to a religious observance provided they **notify their instructors no later than the end of the second week of classes** for regular session classes and by the submission deadline for flexibly formatted classes. Student deadlines are posted in MySlice under Student Services/Enrollment/My Religious Observances/Add a Notification.

Academic integrity: Syracuse University's Academic Integrity Policy reflects the high value that we, as a university community, place on honesty in academic work. The policy defines our expectations for academic honesty and holds students accountable for the integrity of all work they submit. Students should understand that it is their responsibility to learn about course-specific expectations, as well as about university-wide academic integrity expectations. The policy governs appropriate citation and use of sources, the integrity of work submitted in exams and assignments, and the veracity of signatures on attendance sheets and other verification of participation in class activities. The policy also prohibits students from submitting the same work in more than one class without receiving written authorization in advance from both instructors. Under the policy, students found in violation are subject to grade sanctions determined by the course instructor and non-grade sanctions determined by the School or College where the course is offered as described in the Violation and Sanction Classification Rubric. SU students are required to read an online summary of the University's academic integrity expectations and provide an electronic signature agreeing to abide by them twice a year during pre-term check-in on MySlice. <http://academicintegrity.syr.edu>.

The Violation and Sanction Classification Rubric establishes recommended guidelines for the determination of grade penalties by faculty and instructors, while also giving them discretion to select the grade penalty they believe most suitable, including course failure, regardless of violation level. Any established violation in this course may result in course failure regardless of violation level.

Copying homework solutions from any source, including the Internet, is plagiarism and is considered a violation.

Ally Statement: I have participated in the safer spaces training program through the LGBT center at Syracuse University. Please let me know if you use a different name than the one that shows up on my roster, and also let me know the pronouns that you use. I strive to use gender-neutral language in the classroom (e.g. your classmate, singular they), but I have old habits and I am not always successful. Feel free to correct me if I make a mistake.
