Exams: There will be two midterm examinations which will be held on the last lecture day of the following weeks:

Exam 1: Thursday, 23 February 2017

Exam 2: Thursday, 13 April 2017

No makeup exams will be given. For students with an **EXCUSED** absence, the final exam score will be substituted for the missing exam score.

Final Exam: The final exam covers the entire course. It will be given during a two-hour block on **Monday, May 8, 2017- 8:00AM - 2:30 PM**

The exact time and location will be announced later in the semester. Do not make arrangements to leave campus before 2:30 PM on **Monday, May 8, 2017**. The final exam will not be given at any other time.

Homework will be done online using *WeBWork*, an open-source homework system for math and sciences courses. Access information:

1. Go to <http://webwork.syr.edu/>
2. Click the class name. [MAT 284 Spring 2017 Alan](#)
3. Your Username is your NetID, for example jqpublic
4. Your Password is initially set to be your 9-digit SUID. You should change it after logging in

The number of attempts is unlimited. Problems can be done in any order. You do not have to do them all at once. You can also get a PDF file of the entire assignment and print it out to work offline.

Each Friday night a set of WebWork problems will be assigned.

They will be discussed during the following week's recitations and will be due at 11:59pm on the Sunday of that week.

Namely, you will have at least 9 days to finish your hw. Lowest 2 homework scores will be dropped.

Note that all due times are 11:59p.m. EDT (EDT - Eastern Daylight Time. This is the time zone of NY State.) If you are in another state, or country, then check your time zone and submit your homework according to NY time.

Quiz: Starting from the second week of classes, there will be a quiz in recitation similar to the homework problems. The specific sections covered by each quiz will be announced in lecture. There will be no make-up quizzes. The lowest (one) quiz score will be dropped.
