SECTION # M006

Lecture: Tuesday & Thursday 12:30p – 1:50p in 219 Carnegie

Recitation: Friday 12:45p – 2:05p in 122 Carnegie

This is a Syllabus Supplement. Please download and read the Course-Wide/ Extended Syllabus that is posted to our Blackboard course! This syllabus contains information regarding the grading policy, course attendance, Use of technology, Office of Disability Services, the University's Academic Integrity policy as well as other resources and tips.

Email: The best way to contact me is via email. If you write an email, start the subject with "MAT296" followed by your subject. Unless the topic is personal and/or sensitive, the email should also be cc'ed to my TA. I reply to email within 24-36 hours. I cannot guarantee that any email sent outside of normal business hours will be read until business hours resume.

Blackboard: The syllabus, class handouts, and announcements will be posted on Blackboard. It is your responsibility to check Blackboard regularly for any class related information (for homework – please check WebAssign) as well as your student email, as announcements will also be sent to you via email. Grades for quizzes and exams will also be posted in the Blackboard Grade Center. Please note that your earned WebAssign Homework scores are readily accessible in WebAssign. All Homework grades will be transferred to the Blackboard Grade Center at the end of the semester.

WebAssign Homework: WebAssign Homework assignments are available online via www.webassign.net. Homework assignments must be submitted online according to the due dates on WebAssign. Please login and register for the class and the calendar will tell you when assignments are available and their given due dates. You will need an access code (this comes with a purchase of a new textbook or you may purchase this directly from the website).

- You will also need a class key. **The class key is: TBA**
- **Note: Please login to WebAssign daily to check the schedule and work on the assignments.** Written assignments will NOT be accepted. Late homework assignments will NOT be accepted.
- If you use the free temporary access, please do NOT create a separate account once you purchase the code. You can add it to the account that you already have. Technical support for WebAssign is available at <http://support.cengage.com/victoriaweb/primarypage>

Written Homework: In Blackboard, there is also a posted list of assigned textbook (i.e. written) problems. Some problems from these assignments MAY be collected and graded. This will be announced at least one week before the due date. Even in the case where written homework is not collected for grading, it is still in your best interest to complete ALL of the assigned problems.

Syracuse University
MAT296 – Calculus II – Section M006 – Fall 2018
Supplement to the Course Syllabus

- **Note: If written homework is collected and graded, your total homework grade for that material section will be based on both WebAssign Homework and Written Homework.** If you do not turn in Written Homework for grading, your grade for that portion of assignment will be zero. Late homework will NOT be accepted.

Quizzes: Quizzes will be short and administered during recitation. The quiz questions will be similar to homework problems and lecture examples. Each quiz will cover the sections covered in lecture since the last quiz. Quiz topics and reminders will be announced on Blackboard. There are no make-up quizzes. However, to account for emergency situations up to TWO quizzes may be missed. If you take all of the quizzes, your lowest TWO quiz grades will be dropped. Note that quizzes will be administered during recitation each week with the exception of exam weeks. During the week in which you have an exam, no quiz will be administered during recitation.

Exams: Exams will be administered in class. Be sure to bring at least two black or blue pens to each exam. You will not be allowed to use red or pink pen or pencil. Use of calculators or any electronic device is not permitted on exams (or quizzes). Please check the lecture schedule and plan to be in class on the exam day. There will be no make-up exams (for any reason). If you have a documented, extenuating circumstance, please refer to the policy on the Extended/Course-wide syllabus. You will need to contact your instructor and the Dean's Office. In the case of an extenuating circumstance, the 0 will be replaced with the score you earn on the corresponding subsection of the final exam.

Recitation: During recitation in addition to taking quizzes, time will be spent discussing questions about the homework. It is in your best interest to not only finish each assignment, but to understand the course concepts and how to apply them to solving the homework problems.

Attendance Policy: It is your responsibility to attend all classes and complete all activities and assignments.

Grading Note: Your course grade will be based on three midterm exams (each 20%), Quizzes & Homework (15%) and Final exam (25%). Please note that the 15% quizzes and homework percentage will be broken down into 7% homework and 8% quizzes. The grading scale is outlined in the course-wide syllabus.

Extra Credit: There is no extra credit.

Electronic Devices: Please note that calculators and other electronic devices are not permitted on quizzes and exams. If a cell phone or other electronic device is out during exam or quiz then you will *at minimum* receive a zero for that assessment.

Inclement Weather: Be sure that you are signed up for Orange Alert and check the university webpage in the event of inclement weather. In addition, please check your email and Blackboard for course specific information.

Tentative Lecture Schedule: Please refer to Course-Wide Syllabus for tentative schedule. It is crucial for you to be aware of the dates of three midterm exams and the final exam:

1. Exam #1: Week of 9/17
2. Exam #2: Week of 10/15
3. Exam #3: Week of 11/12.
4. Final exam: a two-hour exam on Wednesday December 12, 2018 between 8:00a – 2:30p.

A detailed schedule will be posted on Blackboard.
