Course Description: This course is designed for students in the School of Management. The course will involve no calculus, and a thorough background in high school mathematics is the only prerequisite. The course has three main components: Linear Algebra, Probability & Statistics, and the Mathematics of Finance.

Calculator: This course involves extensive use of the TI-84 graphing calculator. Each student is required to own a TI84 calculator. The calculator will prove to be an indispensable tool throughout the course, particularly in the Mathematics of Finance component. Since the TI84 will be useful, if not essential, for virtually every topic, it is important to familiarize yourself with the calculator as soon as possible. Though the main techniques will be demonstrated in class, it is up to you to become proficient with the calculator on your own. **The TI-84 is the only calculator that may be used on a test without prior approval from your instructor. In particular, calculators on cell phones are not to be used on tests or quizzes.**

Quizzes and Homework: Quizzes and homework based on the assigned exercises below or other resources will be given regularly. There will be no make-up for quizzes. A missed quiz will have a score of zero. Homework will be collected at the beginning of the next class. Extensions will only be given for DOCUMENTED EXTENDED ILLNESSES. One lowest quiz score and one lowest homework score will be dropped.

Attendance and Class Preparation: Students are expected to attend every lecture and are responsible for any announcements made during lecture. Students should read the appropriate sections of the text before the class in which the material is presented.

Tests: A missed exam, **with a valid excuse**, can be made up by the end of the fourth class following the exam. Otherwise, it will be a zero.

DO NOT PLAN TO LEAVE TOWN BEFORE August 13th!
HELP! The main lecturer will hold regular office hours (see above). In addition, the Mathematics Department offers regular math clinics. A schedule of clinic hours will be available in the math office, Carnegie 215, and on the math website: http://math.syr.edu/Help.htm.

Other Problems: These should be resolved with your recitation instructor. Problems that cannot be resolved with your instructor should be referred to the course supervisor, Prof. Graham J. Leuschke at gjleusch@syr.edu.

Learning Outcomes:
• The ability to select an appropriate mathematical model for a given real world problem;
• The ability to understand and enunciate the limitations of conclusions drawn from mathematical models;
• The ability to effectively use appropriate mathematical technology;
• A mastery of the basic properties of matrices and the ability to solve simple matrix equations;
• A mastery of the basic properties and formulas of probability and statistics and the ability to compute simple probabilities in a statistical setting and to interpret the results;
• A mastery of the basic formulas from the mathematics of finance and the ability to apply these formulas in a variety of settings that arise in personal finance.

Grading Policy

The grade for this course will primarily be based on the student’s performance on the three tests and the final.

Cell Phones: All electronic devices other than the calculator should be turned off and put away during class. Calculators on cell phones are not to be used on tests or quizzes.

Students with Disabilities: If you believe that you need accommodations for a disability, please contact the Office of Disability Services (ODS), located in Room 309 of 804 University Avenue, or call (315) 443-4498 for an appointment to discuss your needs and the process for requesting accommodations. The website is as follows: http://disabilityservices.syr.edu. ODS is responsible for coordinating disability-related accommodations and will issue students with documented disabilities Accommodation Authorization Letters, as appropriate. Since accommodations may require early planning and generally are not provided retroactively, please contact ODS as soon as possible. You are also welcome to contact me privately to discuss your academic needs although I cannot arrange for disability-related accommodations. Making arrangements with ODS takes time. Do not wait until just before the first test.

Academic Integrity: The Syracuse University Academic Integrity Policy holds students accountable for the integrity of the work they submit. Students should be familiar with the Policy and know that it is their responsibility to learn about instructor and general academic expectations with regard to proper citation of sources in written work. The policy also governs the integrity of work submitted in exams and assignments as well as the veracity of signatures on attendance sheets and other verifications of participation in class activities. Serious sanctions can result from academic dishonesty of any sort. For more information and the complete policy, see http://academic.integrity.syr.edu.

Religious Observances Policy: SU religious observances policy recognizes the diversity of faiths represented among the campus community and protects the rights of students, faculty, and staff to observe religious holidays according to their tradition. Under the policy, students are provided an opportunity to make up any examination, study, or work requirements that may be missed due to a religious observance provided they notify their instructors before the end of the second week of classes. For fall and spring semesters, an online notification process is available through MySlice (Student Services -> Enrollment -> My Religious Observances) from the first day of class until the end of the second week of class.
